

1500 TURBO/3SEC.

The 1500 LOWTEMP./3SEC. series is a collection of 93 colours, which are thin, stretchable and opaque PU-films with a matt finish.

Thanks to the self-adhesive polyester liner you will be able to cut small letters and reposition your cut design before pressing.

Prepress your textile (only non-sublimated fabrics) to ensure a flat surface for transfer. It also gets rid of humidity inside the fabric and would make it possible for a coating to evaporate and ensure a better bonding.

2 different and quick applications! 165°C for 3-4 sec or 135°C for 6 seconds!

Suitable for: 100% cotton and cotton/polyester/acrylic mixtures.
 For **nylon/hydrophobic** garments we recommend the 3900 Nylon series, for **sublimated** garments the 4000 Subli-Stop series and **stretchable** garments the 2900 SUPER ELASTIC series.

165°C=329°F/135°C=275°F
